

FINALLY...

AN INTELLIGENT BELT MANAGEMENT SYSTEM

RCS INTRODUCES THE RCS1

The most revolutionary conveyor tracking system on the market to date. Our system combines non-contact sensor technology and innovative hardware, yielding exceptionally long belt life, lower operating costs, and less downtime. The RCS1 is impervious to particulates and debris, and is equipped with precision measurement capabilities for fast, accurate alignment and on-the-spot troubleshooting. Designed to meet specific needs in the most demanding environments, the RCS1 will revolutionize your system's efficiency.

SYSTEM FEATURES

- Ultra Reliable Ultrasonic Sensors
- Actuated Bearings with drive module
- PLC Controller with DC Voltage Controls
- Automatic or Manual Control Modes
- Easy System Integration

BENEFITS

- Simple Installation
- Self Correcting
- Reduced Downtime
- Lower Maintenance Costs
- Optimal Belt Life
- Optional Predictive Modeling & Integration

MARKETS SERVED

- Industrial Processing
- Food Processing
- High Tech
- Material Handling
- Thermal Processing
- Mining

"We'll keep you on track!"
